Hi Jeanne,

No, I haven't. I was in a meeting with **non-responsive** all afternoon. But I did have phone calls today with Steve Hess, Susan Mravik, and our contractor at E&E. Susan was able to get the insurance language from the contract with E&E from the Contracting Officer in Region 6 this afternoon, and E&E is supposed to send me their insurance disclosure, together with a statement that they will add Chesapeake as an additional insured for this project once it is all agreed too. **(b) (5)**
(b) (5) I could send those two things to Chesapeake in the morning and throw the ball back in there court. I will also write up more info tomorrow morning.

Ann,

I'm not sure if this is too much information for Bob, but its is additional information follow up from what we had available earlier today on status of resolving insurance issues. Start at the bottom and scroll up for chronological story.

Feel free to pass it on, or I can forward.

Jeanne

Subject: Contract Questions

Mike,
I've been in touch with the contract officer for the E&E contract.
Here's what I have learned:

1. **Contract Information (warranties, insurance, bonding, certificates of insurance) are CBI and EPA will not release to a third party.** It would require a FOIA for EPA to release E&E's info. E&E could be willing to release the info on their own. If they won't and EPA receives a FOIA, EPA still needs to get permission from E&E to release the information, (b) (5) [REDACTED]
2. **Insurance Coverage Amount. EPA will not pay direct charges for insurance if the current contract doesn't have enough coverage.** Requiring E&E to add more insurance after contract award doesn't allow them to figure that additional charge into their rates. So, we cannot require an increase in E&E's insurance coverage.
3. **Sub-contractor Insurance. When the SOW/RFP is announced, it can state a required amount of insurance.**

Hope this helps, Susan

Mike

I think it is safe to assume that anything you can provide in your list would be helpful. Certainly the language in the contract between EPA and EE or some other contractor would be helpful - and yes anything on the EandE's insurance policy etc. And yes, we can resolve without you signing on a drilling contractor. We are simply trying to understand the legal language you use when you contract, Mike.

Subject: Re: Master Service Agreement info

Hi Chris,

I left you a voice mail this morning, following up on the message below from Monday. Any info you can give me on what y'all are

specifically asking for in the Master Service Agreement? Also, as I mentioned this morning, we do not have a drilling subcontractor on board yet, and cannot provide this type of information until we contract with someone. What is Chesapeake's thoughts on that? Can we resolve this without the sub's info?

Subject: Master Service Agreement info

Hi Chris,

We are having trouble identifying what to give Chesapeake in response to your request for the Master Service Agreement. Could you have someone put together a description of what information you are wanting to see included in this documentation? Are you thinking it is between EPA and E&E, or E&E and their insurance provider? Is it E&E's insurance policy, or the contract between EPA and E&E? Something else? Will you want the same from the drilling subcontractor?

Also, if the site characterization shows we don't need the underpad wells, does this cease to be an issue?

Thanks,

Mike
